School of Computer Science

Prof. Christian Wagner – Head of School

About me

- Christian Wagner, Prof. of Computer Science & Head of School
- Grew up in Luxembourg
 - Moved to the UK in 2001
 - BSc Computer Science
 - MSc Robotics & Embedded Systems
 - PhD Computer Science
 - Post-doc in Ambient Int. Environments as part of European Project
- Transitional Fellow → Associate Prof., → Professor → HoS Computer Science at the Uni. of Nottingham
- Visiting Professor Positions including at Michigan Tech., and Carnegie Mellon Uni.
- Lead LUCID (<http://lucidresearch.org>)
 - Lab for Uncertainty in Data and Decision Making
 - Interdisciplinary research group
 - Focus: 'End-to-end handling of uncertain data for decision support'
 - Putting people into a better-informed position to make decisions with AI

**The
Wellbeing
Team**

The Wellbeing Team – Support and Wellbeing (Engagement Team)

The University monitors student engagement using a system called SEAtS, which captures QR scans and Moodle/Echo activity.

It is important that you download and use the SEAtS Mobile app throughout your student journey. Information on how to do this can be found on the [Engaging with your Studies webpages](#)

The Support and Wellbeing Engagement team is here to:

- Check in with students who are identified as not engaging with their studies
- Provide a non- judgmental space to discuss any reasons for non-engagement
- Work collaboratively with students to understand and overcome any barriers to their engagement
- Help students access the right support or policies

If you are going through a period of non-engagement, the team may try to contact you. We always want to hear back from you so we can provide any support you may need.

Looking after your wellbeing while at University

HealthyU

The University's HealthyU programme can help support you to stay healthy whilst at university, helping you make the most of your university experience.

The Health Improvement Team run initiatives and produce resources on a range of topics, including:

- Alcohol, drugs, smoking, addiction and gambling
- Eating well and keeping active
- Mental health and wellbeing
- Sexual health, wellbeing and consent

Where else can you get support at the University?

Disability Support Services

You could be eligible for a Support Plan if you have:

- | | |
|----------------------------------|---------------------------------|
| • A long term health condition | • A mental health condition |
| • Autism spectrum condition | • Sensory or physical condition |
| • A specific learning difference | |

For students who already have a Support Plan:

- Need to update it or discuss further adjustments?
Please contact Disability Support Services to speak to an advisor
- Reasonable adjustments not being implemented as you expected?
Please contact the Support and Wellbeing Team, who can support you by liaising with your academic school to find a resolution

**How to arrange a Support Plan
(reasonable adjustments for exams
and teaching)**

Y2 Welcome

Senior Tutor Team

Peer-Olaf Siebers and Liz Felton

- Senior Tutor Team

- Liz Felton
- Peer-Olaf Siebers

- Our joint email account (quickest way to get a response)
 - Senior Tutor Team: ps-cs-senior-tutor@nottingham.ac.uk
- We aim to respond within 3 days
 - If you do not get a response within 3 days, please feel free to resend your message, adding an @ at the beginning of your subject line

- Personal tutor
 - First point of contact and source of advice for anything related to your studies
 - Tells you where to find further support, or refers you to the senior tutors
 - Oversees your academic progress (and writes references)
 - You should see your personal tutor at least once per semester; you can contact your personal tutor via email to ask questions or to make an appointment
- Senior tutor
 - Providing pastoral care including acting as a secondary source of advice where problems cannot be resolved by personal tutors
 - Attend meetings
 - Learning Community Forum; Teaching and Learning Committee; Senior Tutors' Network
 - Liaise with people and services
 - Director of Teaching and Learning; Support and Wellbeing Service; EC Panel; Disability Liaison Officer

- Welcome to the School of Computer Science
 - <https://www.nottingham.ac.uk/studentservices/welcome/school-and-department-welcome/computer-science/index.aspx>
- CompSci Community Hub
 - <https://uniofnottm.sharepoint.com/sites/SchoolofComputerScienceNewslettersandGeneralResourcesforStudents>
- Student Services
 - <https://www.nottingham.ac.uk/studentservices/>
- Student Enquiry Centre (Information and EC requests)
 - <https://student-enquiries.nottingham.ac.uk/>

- Report + Support (to report incidences)
 - <https://reportandsupport.nottingham.ac.uk/>
- Chaplaincy and faith support
 - <https://www.nottingham.ac.uk/studentservices/services/chaplaincy.aspx>
- Scams (talk to us if you think you have fallen victim to a scam)
 - <https://www.nottingham.ac.uk/studentservices/support/financialsupport/managingyourmoney/fraud-and-scams.aspx>
 - <https://www.nottingham.ac.uk/currentstudents/news/beware-of-scams-targeting-students>
- Progression Questions
 - <https://www.nottingham.ac.uk/qualitymanual/2-documents/ug-regs-flow-chart.pdf>

Extenuating Circumstances

- Extenuating Circumstances (ECs) are events that affect your performance in assessments which are unforeseen and out of your control
 - For exceptional, short-term circumstances
 - QM Regulations: <https://www.nottingham.ac.uk/qualitymanual/assessment-awards-and-deg-classification/ext-circumstances.aspx> (check Section 2)
 - Section 2.3: ECs with Evidence
 - Section 2.4: ECs without evidence (self-certification)
 - Student Services: <https://www.nottingham.ac.uk/student-services/servicedetails/extenuating-circumstances/extenuating-circumstances.aspx>
 - For long term circumstances use the Disability Support Services
 - <https://www.nottingham.ac.uk/student-services/servicedetails/disability-support-services/disability-support-services.aspx> (apply as soon as you join the school)

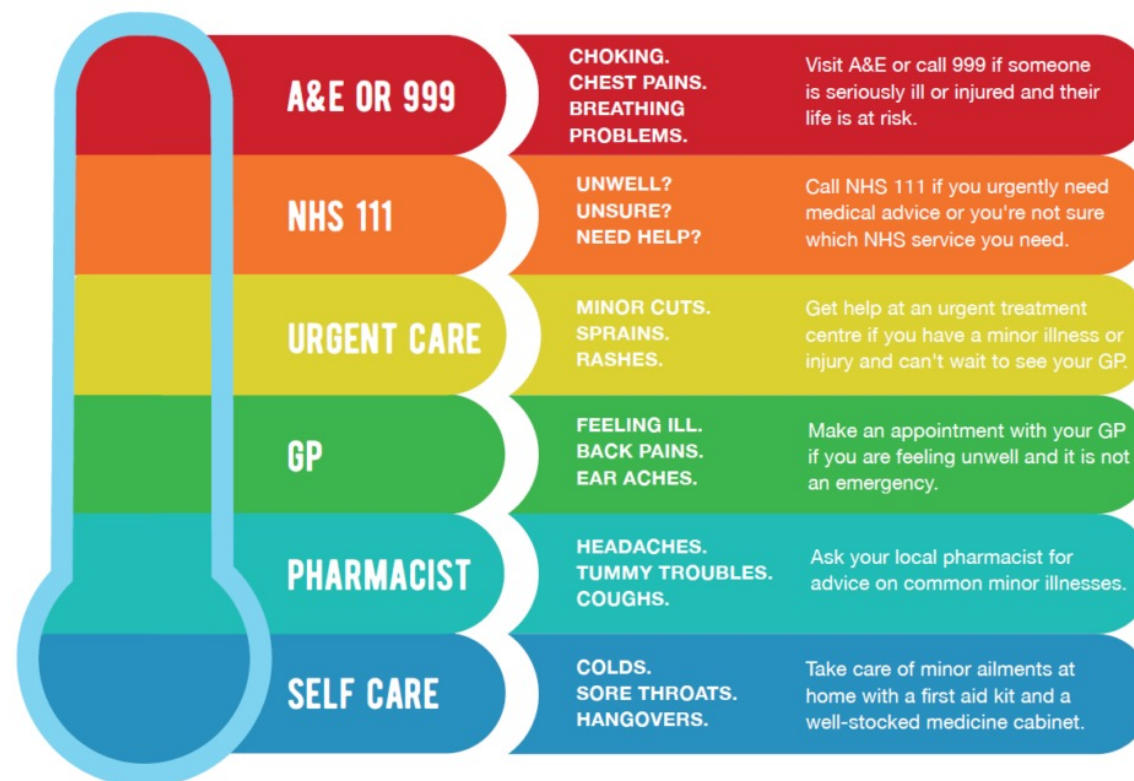

- Disability Support Services
 - Offer support for students with a disability, mental health difficulty, long-term medical condition, autistic spectrum condition, or a specific learning difference such as dyslexia, dyspraxia, dyscalculia or ADHD.
 - <https://www.nottingham.ac.uk/studentservices/servicedetails/disability-support-services/disability-support-services.aspx> (apply as soon as you join the school)
 - Support plan (discuss what can be offered with the Disability Liaison Officer)
 - Reasonable time adjustments for completing coursework and exams
 - Room adjustments during exams ...
 - Remember
 - For long term circumstances use the **Disability Support Services**
 - For exceptional, short-term circumstances use **EC procedure**

Group Projects

Dr Dan Marsden

What are Group Projects

- **Software engineering project** => not just coding
 - **Projects** are provided by **industry partners** and **academics**
 - **Brings together** COMP1003, COMP1005, COMP1009, COMP2013, ...
- Teams of **roughly eight people** with **diverse skillsets** and **backgrounds**

The Roadmap

Semester 1

Project Signup

Competitive Bidding

Project Allocation

Development 1

CV

Proof of Concept

Interim Report

Interim Peer
Assessment

Semester 2

Development 2

Final Product

Showcase

Repos

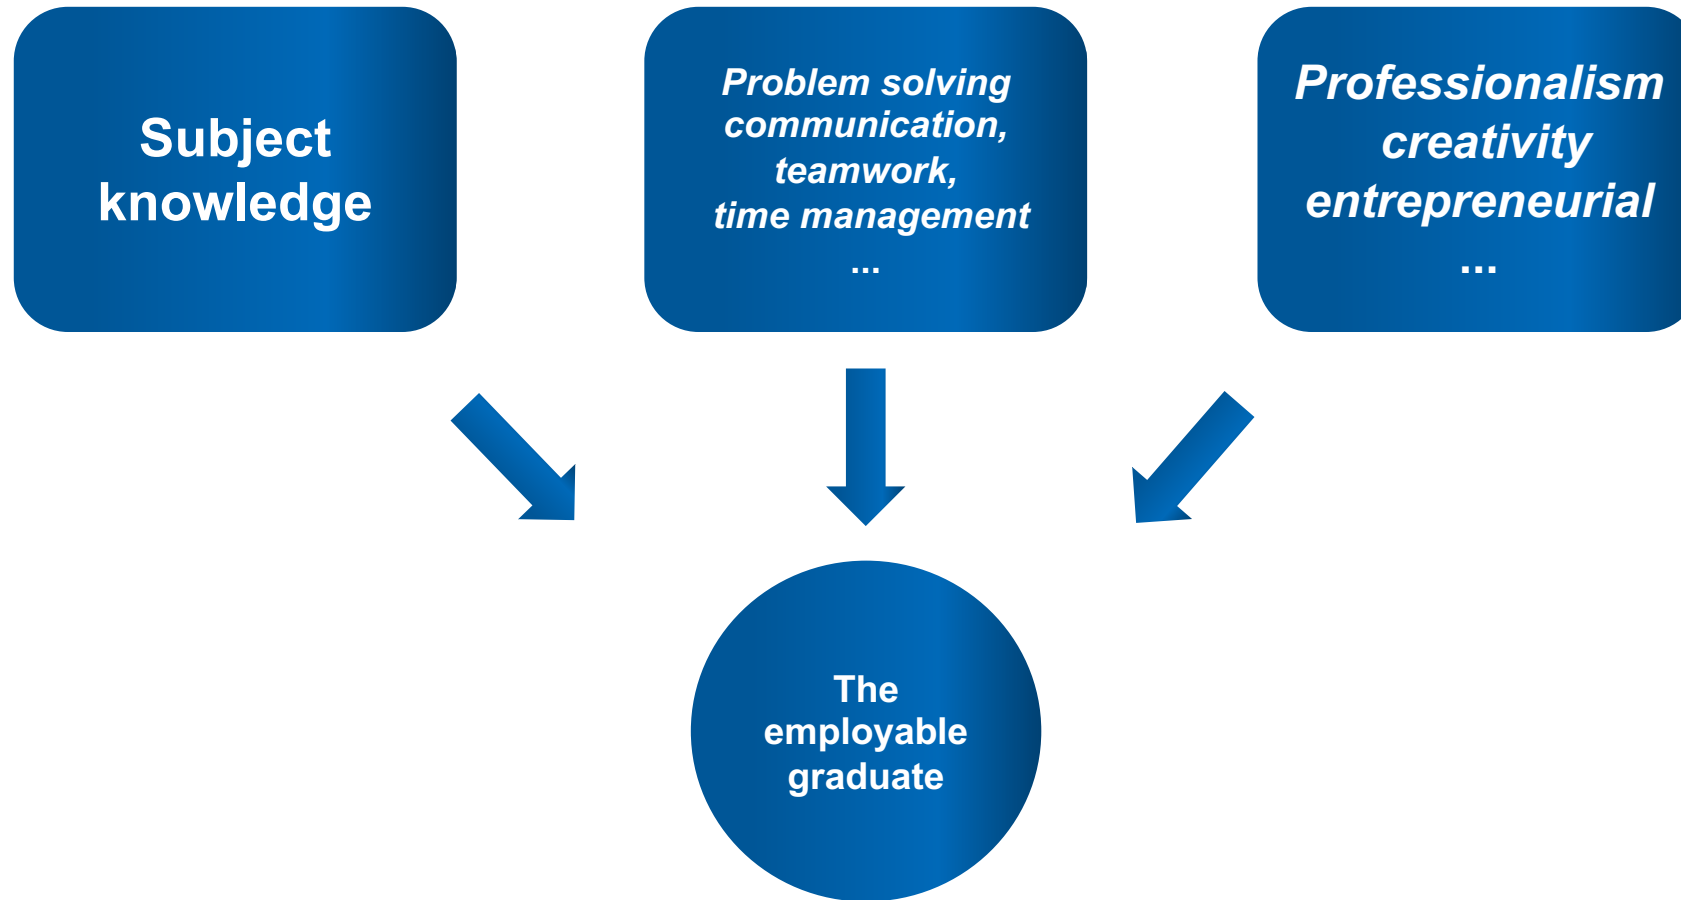

Group Reports

Final Peer
Assessment

Individual
Report

Why Group Projects?

BCS requires students to engage in group work for their accreditation.

Team Allocations

- You should have all **received an e-mail** with:
 - Your **team allocation**
 - The **Git repository** for your team
 - The **MS Teams** site for your team (contact your team members)
 - The “**Team Event Allocation**” (time & location)
- Complete [this form](#) if you are taking COMP2002 but have **not received a team allocation**
- Please log on to <https://projects.cs.nott.ac.uk> for GitLab
 - If you have never logged in before the process to add you to your team will fail.

- **22 – 27/09/2026:**
 - Elect a **team leader**, **team admin** and **Git admin**
 - **Team Admin:** complete [this form](#) by 27/09/2026, 15:00
 - Think about EDI
 - Give **your consent** for pitch/demo video and CV distribution in Moodle
 - **Contact your team** (e.g., in person or in MS Teams)
 - **Start shortlisting** projects
- **30/09/2026 – 02/10/2026:**
 - **Sign up to projects** (registration opens at 09:00 on Moodle)
 - Every team signs up to **three 3 pitches** (FCFS)
 - Successful sign-up => you will be **allowed to bid** (CV, EoI, Pitch)
 - **Allocation of projects** is based on the pitches

Important Dates

- **14/10/2026:** CV / EoI / Pitch video submission
- **19/10/2026:** Pitch day (10:00 – 13:00)
- **20/10/2026:** Project allocation (May run slightly later)
- **11/12/2026:**
 - Interim report
 - Prototype
 - Interim peer assessment

- Attend your **team work sessions**
- Check the [Moodle page](#) and read the [project handbook](#)
- Within the **next 2 weeks**:
 - **Draft your CV** as soon as possible
 - **Draft Eols** as soon as you have signed up
- **Keep in mind: A working prototype** and **interim report** by the end of the first term

This was one of the best experiences I have had so far in Nottingham, to be able to work with an amazing group and help the Computer Science School at the University of Nottingham achieve one of its goals of having a Digital Display that can be used with any transparent surface (such as glass windows, doors...). Besides the hardware that was tested and implemented, this project also required the development of software so the entire system would work as planned.

We plan to further develop this project, expand the display and go beyond the objectives set at the start of the 2018/19 Group Project.

Leave your thoughts here...

Had an excellent time at the University of Nottingham School of Computer Science Group Project open day. Really interesting to demo my team's project for the NHS, and see what everyone else has been doing!

Students' Experience

Joshua Milroy CC • 1st
Second Year Undergraduate Student at University of Nottingham
1d •

I'm so excited to finally share the project I've been working on with **Oliver Strange**, **Oliver Denman**, **Anhiti Sridhar**, and 3 others for the best part of a year now.... PlasmaRand!

Inspired by LavaRand by **Cloudflare**, PlasmaRand was our 2nd year Software Engineering group project which aimed to generate cryptographically true random data from plasma discs, or more specifically photos of them.

Leading this project has been one of the coolest and hardest things I've done in my educational career, and I wouldn't change it for the world. Not only have I made great friendships and learnt a lot techwise, but I've been able to learn so much about myself as a leader, team member, and person.

I'm so proud of how this project turned out in the end, as we actually broadened the horizons of what was originally expected, developing a whole full-stack application which can take ANY source of entropy, not just photos, and feed that to a central entropy pool.

Finally, I'd like to thank **Michael Pound** for giving us the opportunity to work on this project, as well as supporting us throughout the year. I'd also like to thank **Geert De Maere** for running this module, he has done an amazing job making sure everything ran smoothly and trust me, it did!

Oh, also if you're interested, this application uses Java Spring Boot for its API, React for its frontend, Python for socket programming to transfer binary from a source device to the server, an FTP server to hold requested binary files from a web client, a PostgreSQL database to hold information like logs, access tokens, device information, etc. Any questions and I'm happy to discuss :)

Absolutely great to conclude our second year group project module with such a lovely day. Great to show off my team's work, an informative website and content management system in collaboration with **Nottingham University Hospitals NHS Trust** Radiology Department. And also to see the great pieces of work produced by fellow students - which were outstanding.

Massive thank you is in order to **Geert De Maere**, for coordinating this all.

Wow what a day at **#UniversityOfNottingham** today. Congratulations to the winning teams of the Computer Science Group project showcase which was Team 17 Snapmatch coming first and Team 40 for there mind mapping tool coming 2nd winning MHRs sponsored prize of £1200 and £600 respectively amazing work done by all at the **#ComputerScienceShowcase** event. Brilliant to see so many inspiring projects, and a special shout out to Team 40 for all their hard work and commitment on creating an app aimed to "Transform everyday learning" and being able to work alongside **Ka Chun Peter Luk** and **Ian MacKinnon**. Thank you to **Geert De Maere** for organising such a great event, see you next year!

Great to see so many students engaging in their course presentations. It's been fantastic to see our team, Team 34, demonstrating all their hard work on their W3W delivery planning application tailored towards HGV drivers.

Group Project Day takeover!

The Computer Science building belongs to our second year undergrads today as they pitch their projects to industry sponsors, staff members and their peers!

Well done to all!

Thank you to our sponsors:

Just to share a happy news with you .. The group project we had with ATOS in 2020 is now published with a patent ... Proud to say our students were involved in a great project. I share the patent document with you to keep as good case study of how lucky students are working on such amazing projects with industry.

“BCS also commended the School for the quality and usefulness of the second year software engineering group project, and especially the level of industry involvement they saw in the UK.”

- As a team, you must:
 - Schedule regular meetings at pre-arranged times
 - Aim for a fixed meeting format
 - Structure the meeting to ensure all can contribute effectively
- **If you believe that there are any circumstances that I should be aware of (in relation to group work), please drop me an e-mail (dan.marsden@nottingham.ac.uk)**

Group Work is Hard!!!

- **Type one fun** – You enjoy it in the moment and have fond memories afterwards.
- **Type two fun** – Only becomes fun in retrospect. It's great after you stop, but in the moment, it usually involves a lot of stress and suffering.
- **Type three fun** - It involves a ton of suffering and a boat-load of risk. When it finishes you swear you're never going to do anything that stupid ever again.

Be Nice to Each Other

Basic values will matter more than normal:

- Be patient
- Be nice
- Be constructive
- Be polite
- A little empathy goes a long way

If you wouldn't do it at work, don't do it on the group project

Next Lecture

Lecture next Tuesday 9.00 – 10.00

- Hyflex
- Information on selecting projects
- CVs
