University of Nottingham Ningbo China

2024–2026

First two years of the 2+2 programme; GPA: 4.0/4.0 (Top 10%).

IELTS: 7.5 CET-4: 627 CET-6: 601

Internship Experience

China Telecom Fufu Information Technology Co., Ltd.

Jul–Aug 2026

AI Intern – Big Data Applications Division / Data Elements Division

- **Factory safety AI assistant:** Independently built a local Python/Streamlit demo combining rules, Chinese RAG and DeepSeek to analyze inspection findings, cite regulations and prioritize corrective actions. Used BGE/ChromaDB and SQLite for retrieval and traceable task history.
- **Healthcare portal backend:** Developed Spring Boot REST APIs for homepage configuration, business metrics and news using MyBatis/MySQL and Nacos. Checked database and gateway compatibility and documented integration requirements and release handoffs.
- **Hyperledger Fabric platform:** Rebuilt the local environment with WSL and Docker Compose and automated startup and verification. Fixed Go chaincode defects to improve reliability while preserving ledger and API compatibility.
- **Additional work:** Built a LangGraph plan-and-execute agent prototype; contributed compliance-rule acceptance cases and OpenSandbox offline scripts for runtime selection, validation and rollback.
