Education

University of Nottingham, UK

Sep 2026 - Jun 2028 (expected)

BSc Computer Science with Artificial Intelligence (2+2), Jubilee Campus.

University of Nottingham Ningbo China

2024 - 2026

First two years of the 2+2 program; GPA: 4.0/4.0 (Top 10%).

Dean's Scholarship: 2025 - 2026. IELTS: 7.5.

Profile

Computer Science and AI student with hands-on experience in Java APIs, SQL data handling and safety-report analysis. Interested in building a responsible reporting prototype with traceable status history, clear failure handling and a complete submission-to-review workflow.

Internship Experience

China Telecom Fufu Information Technology Co., Ltd.

Jul 2026 - Aug 2026

AI Intern | Big Data Applications Division / Data Elements Division

Healthcare portal backend

- Developed Java/Spring Boot REST APIs for homepage configuration, business metrics and news; implemented MyBatis/MySQL data aggregation, Nacos configuration and error handling.
- Checked database and gateway compatibility and documented integration requirements and release handoffs for frontend and deployment colleagues.

Factory safety AI assistant

- Independently built a Python/Streamlit demo combining rules, Chinese RAG and DeepSeek to analyze safety findings, cite regulations and prioritize corrective actions.
- Created submission, results and history views with SQLite persistence; separated the UI from analysis services and made task progress, source references and failures visible to users.

Verification and engineering handoffs

- Contributed compliance-rule acceptance cases and usage documentation; strengthened Go chaincode regression coverage and automated local Fabric verification while preserving API and ledger compatibility.

Academic Project

Image Classification System | 2025

- Built a PyTorch/ResNet18 training/evaluation pipeline with augmentation and optimizer comparisons; containerized a Flask REST inference service with Docker for reproducible deployment.

Technical Skills

Programming & data: Java, Python, Go, C/C++, SQL, Shell; MySQL, SQLite, Pandas.

Backend & interfaces: Spring Boot, MyBatis-Plus, REST APIs, DTO/VO, Nacos, MinIO, Flask, Streamlit.

Engineering: JUnit, Go testing, Git, Docker Compose, WSL/Linux, acceptance testing, integration documentation; PyTorch, RAG, Hyperledger Fabric.
