Education

University of Nottingham, UK

Sep 2026 - Jun 2028 (expected)

BSc Computer Science with Artificial Intelligence (2+2), Jubilee Campus.

University of Nottingham Ningbo China

2024 - 2026

First two years of the 2+2 program; GPA: 4.0/4.0 (Top 10%).

Dean's Scholarship: 2025 - 2026. IELTS: 7.5.

Profile

Computer Science and AI student with Java/Go development, regression testing and local system integration experience. Interested in contributing game-state logic and testing to a faithful Pacman implementation while developing graphics and sound programming skills.

Internship Experience

China Telecom Fufu Information Technology Co., Ltd.

Jul 2026 - Aug 2026

AI Intern | Big Data Applications Division / Data Elements Division

Hyperledger Fabric platform and Go chaincode

- Improved Go chaincode reliability by fixing record-ordering and input-validation defects; added regression coverage while preserving existing API and ledger compatibility.
- Rebuilt a local Hyperledger Fabric environment with WSL/Linux and Docker Compose; automated startup and integration checks for repeatable verification and delivery.

Factory safety AI assistant

- Independently built a Python/Streamlit safety-analysis demo using rules, RAG and DeepSeek; separated analysis services from the UI and added traceable results and SQLite task history.

Healthcare portal backend

- Developed Java/Spring Boot REST APIs for homepage configuration, business metrics and news using MyBatis/MySQL; checked integration compatibility and documented release handoffs for frontend and deployment colleagues.

Academic Project

Image Classification System | 2025

- Built a modular PyTorch/ResNet18 transfer-learning pipeline for preprocessing, training and evaluation; applied data augmentation and compared optimizers through repeatable experiments.
- Containerized a Flask REST inference service with Docker for reproducible deployment, separating model processing from the service interface.

Technical Skills

Programming: Java, Go, Python, C/C++, SQL, Shell, MATLAB.

Testing & delivery: JUnit, Go testing, Git, Docker Compose, WSL/Linux, regression tests, API compatibility checks, integration documentation.

Application development: Spring Boot, REST APIs, MyBatis-Plus, MySQL, Flask, Streamlit, SQLite; PyTorch, ChromaDB, LangGraph, Hyperledger Fabric.
